# UNPRECEDENTED EFFICIENCY. REMARKABLE SPEED.

One of Regal's greatest engineering achievements occurred in 1995, the FasTrac hull. This patented and award-winning design has been thoroughly refined, proving its excellence year after year. At the heart of this marine marvel is our full-beam step. When combined with an aerated bottom, friction is dramatically reduced, allowing the boat to glide effortlessly on the cushion of air created between the hull and the water's surface. The result is up to 26% faster speeds and 30% better fuel efficiency. On paper, those numbers are impressive. On the water, they're absolutely astounding.

## BENEFITS OF FASTRAC

### 26% FASTER CRUISE SPEEDS

Regal's innovative full-beam step is engineered to channel air under the hull, reducing drag and friction. This results in unprecedented 26% faster cruising speeds.

### 30% BETTER FUEL ECONOMY

The FasTrac hull allows for smaller engines, providing better fuel efficiency while still outperforming competitors with larger engines.
